### ASSIGNMENT -3-

Implement a web page using the same theme, meaning colors, elements styles, menu, and footer as the one used for Assignment-1. Like the layout of Assignment-2.

The web page must use Ajax to retrieve data from the server, jQuery or the Fetch API may be used.

- The web page should display a survey to the user.
- The survey questions and possible answers must be retrieved from a JSON file stored on the server.
- The survey will have a text field for the user's name.
- The survey will have a text field for the user's email.
- The survey will have a submit button (not functional for the moment).
- The survey questions are:
  - Which menu item is your favorite?
    - Salad
    - Burger
    - Soup
  - Which entrees items do you usually order (select all that apply)?
    - Chicken wings
    - Onion rings
    - Quesadilla
    - Nachos
  - Write your comments:
